Mountain View, CA 94043

This week the median list price for Mountain View, CA 94043 is \$1,835,000 with the market action index hovering around 62. This is about the same as last month's market action index of 62. Inventory has held steady at or around 7.

MARKET ACTION INDEX

This answers "How's the Market?" by comparing rate of sales versus inventory.

Strong Seller's Market

Home sales continue to outstrip supply and the Market Action Index has been moving higher for several weeks. This is a Seller's market so watch for upward pricing pressure in the near future if the trend continues.

MEDIAN LIST PRICE

Again this week we see prices in this zip code remain roughly at the level they've been for several weeks. Since we're significantly below the top of the market, look for a persistent up-shift in the Market Action Index before we see prices move from these levels.

SEGMENTS

In the quartile market segments, we see the upper end of the market in this zip code showing signs of strength. While this strength hasn't percolated through to Quartiles 3 and 4 yet, expect the low end of the market to follow up, should the upper-end strength continue.

Mountain View, CA 94043

PRICE PER SQUARE FOOT

While prices have been basically flat, the price per square foot has been heading downward. While not a sign of broad strength in a market, larger homes are coming more available and buyers can see more home for their money.

INVENTORY

Inventory has been falling in recent weeks. Note that declining inventory alone does not signal a strengthening market. Look to the Market Action Index and Days on Market trends to gauge whether buyer interest is changing with the available supply.

MARKET ACTION INDEX

Home sales continue to outstrip supply and the Market Action Index has been moving higher for several weeks. This is a Seller's market so watch for upward pricing pressure in the near future if the trend continues.

MARKET ACTION SEGMENTS

Not surprisingly, all segments in this zip code are showing high levels of demand. Watch the quartiles for changes before the whole market changes. Often one end of the market (e.g. the high-end) will weaken before the rest of the market and signal a slowdown for the whole group.

MEDIAN DAYS ON MARKET (DOM)

The properties have been on the market for an average of 70 days. Half of the listings have come newly on the market in the past 52 or so days. Watch the 90-day DOM trend for signals of a changing market.

SEGMENTS

It is not uncommon for the higher priced homes in an area to take longer to sell than those in the lower quartiles.
