This answers "How's the Market?" by comparing rate of sales versus inventory.

Strong Seller's Market

Home sales continue to outstrip supply and the Market Action Index has been moving higher for several weeks. This is a Seller's market so watch for upward pricing pressure in the near future if the trend continues.

MEDIAN LIST PRICE

The market seems to have paused around this plateau. The Market Action Index is a good leading indicator for the durability of this trend.

SEGMENTS

Prices have settled at a price plateau across the board. Prices in all four quartiles are basically mixed. Look for a persistent shift (up or down) in the Market Action Index before prices move from these current levels.

PRICE PER SQUARE FOOT

The market plateau is seen across the price and value. The price per square foot and median list price have both been reasonably stagnant. Watch the Market Action Index for persistent changes as a leading indicator before the market moves from these levels.

INVENTORY

Inventory has been relatively steady around these levels in recent weeks.

MARKET ACTION INDEX

Home sales continue to outstrip supply and the Market Action Index has been moving higher for several weeks. This is a Seller's market so watch for upward pricing pressure in the near future if the trend continues.

MARKET ACTION SEGMENTS

Not surprisingly, all segments in the market are showing high levels of demand. Watch the quartiles for changes before the whole market changes. Often one end of the market (e.g. the high-end) will weaken before the rest of the market and signal a slowdown for the whole group.

MEDIAN DAYS ON MARKET (DOM)

The properties have been on the market for an average of 64 days. Half of the listings have come newly on the market in the past 27 or so days. Watch the 90-day DOM trend for signals of a changing market.

SEGMENTS

It is not uncommon for the higher priced homes in an area to take longer to sell than those in the lower quartiles.
