This week the median list price for Newton (Ma), MA is \$1,349,000 with the market action index hovering around 84. This is an increase over last month's market action index of 70. Inventory has decreased to 5.

**MARKET ACTION INDEX**

This answers "How's the Market?" by comparing rate of sales versus inventory.

**Strong Seller's Market**

Home sales have been exceeding new inventory for several weeks. However prices have not yet stopped falling. Since the market is already in the Seller's zone, expect prices to level off very soon. Should the sales trend continue expect that prices could climb from there.

**MEDIAN LIST PRICE**

Again this week we see a downward notch for prices. Pricing has been weak in recent weeks and versus their absolute-high level. The Market Action Index is a good leading indicator for the durability of this trend.

**SEGMENTS**

Price weakness is evident across the board. All four quartiles have been in price decline in recent weeks. Look to the Market Action Index as a leading indicator of the bottom of the market.

### PRICE PER SQUARE FOOT

Despite recently falling prices, the price per square foot has stayed reasonably flat. This implies that there's a portion of the market being priced at a premium. You can investigate this condition in the quartile details.

### INVENTORY

Inventory has been climbing lately. Note that rising inventory alone does not signal a weakening market. Look to the Market Action Index and Days on Market trends to gauge whether buyer interest is keeping up with available supply.

### MARKET ACTION INDEX

Home sales have been exceeding new inventory for several weeks. However prices have not yet stopped falling. Since the market is already in the Seller's zone, expect prices to level off very soon. Should the sales trend continue expect that prices could climb from there.

### MARKET ACTION SEGMENTS

Not surprisingly, all segments in the market are showing high levels of demand. Watch the quartiles for changes before the whole market changes. Often one end of the market (e.g. the high-end) will weaken before the rest of the market and signal a slowdown for the whole group.

### MEDIAN DAYS ON MARKET (DOM)

The properties have been on the market for an average of 38 days. Half of the listings have come newly on the market in the past 18 or so days. Watch the 90-day DOM trend for signals of a changing market.

### SEGMENTS

It is not uncommon for the higher priced homes in an area to take longer to sell than those in the lower quartiles.
